Nowadays the healthcare industry is becoming more connected with other fields like technology and business practices. The demand for trained professionals in these areas continue to grow more every day. The constant growth of health care providers in Texas is highlighting this need even more for our region.

The Texas A&M University-Kingsville College of Business Administration designed the online graduate-transcripted Certificate in Health Informatics for professionals who want to increase their knowledge in the area of health information technology and be able to take on additional informatic-related responsibilities or embark upon new careers as managers or information systems personnel of hospitals, pharmacies or any other type of healthcare provider.

Employment for [Health Informatics Professionals] will be expected to grow by 23% from 2012 to 2022, and the [U.S. Bureau of Labor Statistics] suggests that the median average salary is $92,810.
