

## Class Codes – Controlled Property

Controlled assets are property classes that the Comptroller requires agencies to report to the State Property Accounting System. The list below includes the items the Comptroller requires agencies to report to State Property Accounting System. Your agency should have an internal review to make sure you know who has these items and where they are at all times. (Controlled items should not be reported in the Capital Assets section of your Annual Financial Report (AFR) and are not depreciated.)

### Controlled (at any cost)

Object Code	Property Item	More Description
