Frank H. Dotterweich College of Engineering

2018 Annual Engineering Student Design Conference

Evaluation of Senior Design Technical Presentations

Project Title: _____ **Project team's major:** _____

Your Name: _____

Please circle if you are: Faculty Industry Professional Alumnus Community Member Student

Please assess the degree to which the group demonstrated mastery of the following skills using the scale:

5 = Exemplary; 4 = Very Good; 3 = Satisfactory; 2 = Developing; 1 = Unsatisfactory

If you believe a skill is not applicable to the project, circle NA

The presentation demonstrated the students' ability to...	Assessment					
1) Identify, formulate, and **solve engineering problems** by applying knowledge of math, science, and engineering.	5	4	3	2	1	NA
2) **Design** engineering-based solutions to satisfy a given set of requirements.	5	4	3	2	1	NA
3) **Communicate** effectively.	5	4	3	2	1	NA
4) Recognize professional and ethical responsibilities in **making engineering decisions** based on global, economic, environmental, and societal context.	5	4	3	2	1	NA
5) Function effectively as a member or leader of a **team**.	5	4	3	2	1	NA
6) Design and conduct experiments / **analyze and interpret data**.	5	4	3	2	1	NA
7) A**cquire and apply new knowledge** as needed in the project.	5	4	3	2	1	NA
8) Design incorporating appropriate **engineering standards**.	5	4	3	2	1	NA
9) Design incorporating **multiple realistic constraints**.	5	4	3	2	1	NA
