

ITS.SC.500 Emergency Lighting

Approved Sept. 10th, 2020
Next Scheduled Review: Sept. 10th, 2025

Procedure Statement

Texas A&M University-Kingsville (TAMUK) employs and maintains automatic emergency lighting systems for the University computer center facility that activates in the event of a power outage or disruption and that covers emergency exits and evacuation routes within the facility.

Reason for Procedure

This Control applies to all TAMUK network information resources. The intended audience for this Control includes all information resource owners, custodians, and users of information resources.

The lack of automatic emergency lighting during power outage or disruption may potentially disrupt continuity of business functions.

Procedures and Responsibilities

Information resource owners with responsibility over infrastructure equipment shall employ and maintain automatic emergency lighting for the information resource that activates in the event of a power outage or disruption and that covers emergency exits and evacuation routes within the facility.
