Mean: -
Thanks for everything just ready to get out of here.

The above annual salary chosen would be for the job after graduation and before pharmacy school. After pharmacy school, salary is way higher.

I have thoroughly enjoyed my time at TAMUK because the faculty made classes enjoyable and it was more a social setting family based atmosphere. I enjoy TAMUK, I did have problem with a certain financial staff member on serval occasions and found him rude and offensive but overall TAMUK is great.

Would have been better if all options were presented in the beginning instead of too late to do anything about them.

I enjoyed my experience on this campus very much!

A lot of the chair backs in the engineering building are broken. Computers in the computer lab in the engineering building and in the lab classrooms are extremely slow.

I enjoyed my time at TAMUK, but my main concern is that bad students are bullying the faculty into giving them grades they don’t deserve. This is a wrong and it undermines the standards of the respectable academics. Merely taking a class should not automatically grant anyone "A" in the class.

I will take speech in the summer session I. I am only 20 years old. I attended UT in Austin my freshman year and transferred to TAMUK my sophomore year to be closer to family. I have been accepted to irma lerma rangal college of pharmacy and I know it is due to the great staff and advisors here. Ms. Amanda Muniz was a great help to me during my years here. She is a wonderful asset to TAMUK campus.

A mandatory cause on others for all majors might be a good idea so that students have a better chane of entering the work force and post-grad life with such a code to utilize in addition a course on general life skills should be offered that covers financial management(many management before graduation and post-graduation), work load management, stress management, ethics(environmental, responsibility, etc..)

AE degree plans need revisions
Even though I've met some great people here at TAMUK, I was completely and overall dissatisfied with the way I was directed and counseled here. For example, Financial Aid is a department that is unfriendly and disorganized. Several times my paperwork was either lost or they couldn't give me direct answers. All except one, who was a man always joking but straight forward in the questions I asked. He sat at one of the front windows and was always helpful. For that I am grateful. As for my department, I had never felt so belittled. The department in which I had my minor in (Psych) was fabulous. People and professors were helpful and friendly. However, in the department of my major I had professors who by the way are our second advisors (which I think is unnecessary and time consuming) try to discourage me and steer me away from their department. I've even had one walk me to psych department and get a degree plan for me. Another directly told me I couldn't have family while pursuing their major and suggested that I change my major or go to a community college. Because of this, my experience here has been unethical and unjustly or the money I paid.

My experience at TAMUK has been wonderful since the first day I attended school here. I am glad I chose TAMUK and would not hesitate to choose TAMUK every again if I had to

I plan to keep studying, get my major degree in this school, because I have attended two other colleges and this school is the best! I have not applied to the master’s program but plant to do so soon!

The computers in the McNeil lab were extremely outdated to the point where functionality was being sacrificed. Every other computer is broken. The equipment is very dirty. The equipment for the Mechanical engineering lab is also broken. Computers in the 1st floor Ec lab are also broke (almost every other computer)

Excellent school!!

I came into TAMUK not knowing how much bad the campus or my program. I am glad to say that both exceeded by expectations.

The questions on this survey regarding faculty are difficult because not all faculty member are the same some have really taken time to help me out which has been great while others seem to just want to answer a quick question and get rid of you or just refer you to someone else. I started here as a freshman. For one semester then transformed to a undergraduate school here and come back to finish overall this has been a great school and experience.

Great Engineering school!!
Camera on campus should be in working order or removed. I had a bike stolen and my friends bike was vandalized and security couldn't do anything because the cameras were either off or not working. Also, the school of engineering should get newer computers to run the heavy software packages like solid works.

The CSDO program was excellent. I was well prepared to become a speech-language pathology assistant.

The AE department facility needs to grow. The building itself can be used to teach outside of the classroom. Our EC building is just like any other building plain simple.

The family welcome environment is what made TAMUK feel like home.

I applied to TAMUK with intentions of pursuing studies in Natural Gas & Chemical Engineering. From my freshman year, I have received poor advisement from department faculty and administrative chair. I was deferred from accepting internships during my freshman and sophomore years. Additionally the department has never allowed me to do research in my field of study. Due to the poor quality of staff there is a hardly any research opportunities in the department of Chemical & Natural Gas Engineering. I have had to extend myself to all types of companies because their Human resources departments do not consider after department to equitably meet their recruitment standards. Eg. BP, Shell, Exxon, Oxy. We need to hire new professors that are interested in research and advanced studies in the major chemical & petroleum issues.

Biggest problem I experienced was hiring my transcript filed from south texas college. Also access to the campus would improve if parking spots would stop being reduced. Re-evaluate your policy if you plan on expanding student population.

The CSDO program at TAMUK is superb and I would like to continue my education at this university for that matter.

I did it!!!

I strongly enjoyed attending TAMUK.

I plan to attend graduate school in New York, US for my masters and doctorate in Industrial/Organizational Psychology while working as a fashion model for an agency that has recently offered me a contract. A large concern I have for my future is the lack of I/O psychology courses and experience that I have. I hope I am somewhat prepared for this major at the graduate level and not behind nevertheless. I do not regret attending TAMUK and I am proud to be a Javelina Go hogs!!

TAMUK was a wonderful experience. Every aspect of this school has shaped me to be an effective student and professional. The CSDO faculty is top notch!! I am honored to be a javelina!

| I have really loved the education and experience TAMUK has given me. I feel like the faculty really prepare students in their fullness. Its been great, and I am proud to be graduation from such an amazing university. TAMUK has offered me the best education possible and has opened many doors, for my future successes in my career and life. Thank you! |
| Amazing experience that I would not change for anything. Advising in the arts department was excellent! |
| I want to thank Miguel Briseno and Laura Knippers in office of admissions for offering me the opportunity to work with them as an orientation leader. Getting to know your professors and faculty helps make a smooth transition into college! |
| My overall experience at TAMUK was amazing. The CSDO program is excellent as well as all the other fields. Our staff, faculty & classmates were always a great team. I learned so much from my professors not only about the education I need but how to represent myself, my school & our professors when we go out in search of job opportunities. They taught me to carry myself with a upmost dignity and to always be honest. I would consider TAMUK as a place to continue my graduate education. |
| Don’t let humanities a trophy. I know this is an A&M school, out of the top 1% have a far amount of literal arts degree holders among them. Get a real economics program off the ground this is the 21st century guys. You spend all that money on the Business Admin building and you have not even an economics minor? Get SSTRR! Ridiculous, every other university worth anything has SSTRR access. It can’t cost that much, add a 1$ tax or something. The A&I name has something outside the Kingsville and will have for opportunities for graduate student. Offer than that past much to say ! |
| I really enjoyed the time. I was here at the university, the start was friendly and I loved my classes and the professors were great. |
| Quit giving teachers all the parking. If commuters don’t find parking then they get frustrated & slap & quit punishing for absences, we pay a lot to attend so its our choice to skip or not. Teachers cancel without warning all the time & its not like we get our money back. |
This school is great for my major but the growing class sizes may start to become a problem. Also, some students are not going to grad school right after graduation. The professors have some negative toward this and they are discouraging to the students from going to work.

Go Hogg’s!

The professors at our university and their staff were very nice and helpful however other employees such as those in the admission grow business more and special programs department were very rude and are in need of serious customer service/social skills.

Over all great experience

From 2006-2012, this university has made many good changes. Aesthetics expansion, programs etc. over all good improvements. Thanks to the students for more feedback. Vitalize the organizations and great life to improve more. Student Government Association should always be helpful. I hope to see more improvements in several years. Proud to be a Javelina!

Good College Experience

I am outta here! :)

Enjoyed my time here

It’s been fun. Can’t wait to go out into the world

The rude mentality of different areas. The Naiviate of we don’t have water the lawn at noon or have every classroom like a meat locker- financial aid was a nightmare. That whole department is extremely uncanny inconsiderate rude. Financial Aid is the main reason you have 60 % retention. Pair all of this with nothing to do on campus and being bored. And people want to leave. I know I do.

The university is making strides towards improvement and it seems the student experience will be enriched by these efforts. Improvements to the library and computer resources around campus and especially in EC would be very beneficial to improving the learning experience.

Overall thoroughly enjoyed my time and the people here. However due to rapid student population expansion several areas of campus have room for improvement. My biggest complaint is the out date library. I really need to be brought up to date in my opinion.

Financial Aid, registrar & admissions need to improve. Have had bad experience. If not for my family living here I would have gone somewhere else just because of the service from the three offices.
I had a good time in this university. All the students and faculty members were very co-operative and helpful. This helped me to understand the study material easier.

I like the small class sizes and availability of the professors. The computer lab in the EC could use improvements as the printer never works and the internet is down on the weekends. Professors could do better jobs with their graders; a lot of the assignment are graded with random points awarded so hard to tell where your mistakes were.

The lab equipment in many labs was either broke or not working properly. The teachers with an accent were very hard to get use to.

I am really blessed that my husband and I have decided to finish our education at TAMUK! We had a good team of teachers. I really wished from day one of starting college we should have applied here!

I have called admissions several times and have left messages about any transfer credit but have not been able to speak to anyone about my issue on over a week.

Very good school. I enjoyed the teachers to student ration. As a freshman, God really used the BSM (Baptist Student Minority) to reach out to me. Now I am a true Christian trying my best to live out for Jesus.

School was a great experience to me. I learned a lot which helped tremendously in battering my education.

Lab (Chemistry, Physics) are Joke! Including the TA's!

The campus has a huge problem with cheating by using old tests so students are not learning as much. There are certain professors who are inappropriate by making racial remarks, prohibiting religious activities (saying “bless you”) and simply lecture the entire time without making sure students are learning. The campus is very clean, the student activities/ clubs are amazing and the staff acts like your their neighbor.

I have some comments or suggestions about some possible causes that should be offered mandatory cause on ethics for all majors might be a good idea so that students have a better chance of entering the workforce after graduation with such a code to use in their workplace. In addition, a course on general life skills should be offered that covers financial guidelines, workload management, stress management, ethics, etc. Before graduation and post-grad money management. Environmental responsibility etc. The workshops offered here on these topics aren’t taken advantage of enough, but a course like this might help.
Thanks for the memories

There are many organizational problems and some administration staff is extremely disrespectful about a year ago. The business office made a mistake on my account, wanting me to pay $2000, which I did not owe. I had to resolve the situation myself and then I gave the appropriate paperwork. I did not receive even the slightest apology. When I first transferred here, the financial aid process was confusing to me and to make matters worse, there was this one particular man in the office who was condescending and rude to me constantly.

I am very pleased with my decision to attend TAMUK & graduate from TAMUK. I could not have gotten caring teachers here, especially Dr. Ken Escudero & Dr. Maurs Castro. They have been great mentors & really care about the students opinions.

My learning experience at TAMUK has been excellent. I have had to work and attend college at the same time which is why it took me so long to graduate. Then should or needs to be more courses that are offered during the evening for these kind of students.

The two major complaints I have from my experience here at TAMUK was the advertisement I received and the financial aid department. There were some changes done for the advisement while I was here and it was that our professor of CSDO were to advise us. I was given incorrect advisement and I was held back from graduating in May 2012. I also always received very rude service from a man named Joe I believe. He in particular was had the worst service and others along with him. Many people at this campus aren't very informed about a lot of information. Everyone says something different.

Great atmosphere among fellow students & faculty. Suggest remodel the housing in Martin Hall, and a better selection of food in Javelina dining hall.
