

Summer Environmental Engineering Academy (SEEA) Program

The *SEEA Program* is an excellent opportunity for middle & high school students to learn about environmental sustainability, engineering and science fields and get hands-on engineering experience.

Highly motivated, inquisitive rising students are invited to a one-week non-residential experience at our College of Engineering.

- When: July 25-29, 2022 (9 am - 4 pm; Friday, July 29 ends at 1:00 pm).
- Registration Fee: \$30/day or \$100/week, if selected (submit an essay on your interest in the environmental engineering and science field for free registration).
- **Use QR code to apply or visit the following webpage:**
<https://www.tamuk.edu/engineering/departments/even/index.html>

SEEA Program includes:

- Fun design hands-on environmental projects and activities, guided by our environmental engineering faculty and students.
- Exploration of research and career paths in environmental sustainability including areas of climate change, geospatial analysis, water quality and quantity management, air quality and pollution control, waste management, coastal erosion, desalination, etc.
- Tour to our environmental engineering department facilities and labs.
- A taste of college life.
- Program materials, lunch and snacks are provided.
